

Introduction

Welcome and thank-you for selecting Luggage Lizards World Tour as part of your book collection.

It is our desire to help children learn. This enlightening book is designed to;

- keep their mind active and engaged
- use rhymes to help a child remember key elements about a country
- take you beyond a visual representation of an area by adding symbolism
- serve as a tool for memory and intuitive expansion.

This format enhances the normal picture and text experience, and takes advantage of the curiosity, depth and growth of a child's mind by giving them just enough information to encourage them to want to learn more.

Captivating pictures of simple strokes and flow, vibrancy, and color invigorate synapse connectivity.

The symbolism, such as the branch of Germany representing a choice point, sunflower of Japan replicates their flag's sun without rays and takes you into their positive outlook. All are designed to be calming, meditative and invigorating.

Luggage Lizards World Tour is a journey that induces an influx of positive energies into your child's sensations and perceptions.

It balances the cognitive activity to improve the precise orchestration of circuits and their components by stimulating both right and left brain activity, to provide a well-rounded understanding of the diversity within text, sub text and imagery.

I invite you to read with a child, encourage them to remain engaged, talk about things they see in the pictures from textures, colours, and emotions that are experienced as they look and read the text.

Learn from their perceptions, add yours to theirs, and create a wonderful and fulfilling experience that can be carried through any level of the relationship. With your effort, together we can create intuitive children that listen beyond the words.

Cherish the Journey.

Tracy and David Repchuk
